

	<p>For example: or =</p> <p>If a perpendicular card is picked in the first round, the first toothpick will be placed facing upward or away from the straight forward direction of the goal.</p> <p>For example:</p>  <p>If a parallel card is picked in the first round, this will be discarded to the bottom of the pool of cards and a new card will be picked.</p>
<p>Steps</p>	<p>Step 1: Set a start and finish line per player. The finish line needs to be 10 straight sticks away from the start line</p> <p>Step 2: Keep the shuffled pack of cards in the center between the players</p> <p>Step 3: In each round players pick one card from the pack and they have place sticks based on the rule that it suggests</p> <p>Step 4: The player that reaches the finish line with the least number of sticks wins</p>
<p>Images or Illustrations</p>	<p>Example of how a game might look like:</p> <p>Play 1: Straight Play 2: Parallel Play 3: Perpendicular Play 4: Straight Play 5: Perpendicular Play 6: Straight Play 7: Perpendicular Play 8: Parallel Play 8: Perpendicular Play 9: Straight</p>

	 <p>Example of each card:</p> <table border="1" data-bbox="402 661 1399 1024"> <tr> <td data-bbox="402 661 730 1024"> <p style="text-align: center;">STRAIGHT</p> <p>You can place your cards this way:</p> <p style="text-align: center;">_ _ or </p> </td> <td data-bbox="730 661 1063 1024"> <p style="text-align: center;">PERPENDICULAR</p> <p>You can place your cards this way:</p> <p style="text-align: center;">_ or _</p> </td> <td data-bbox="1063 661 1399 1024"> <p style="text-align: center;">PARALLEL</p> <p>You can place your cards this way:</p> <p style="text-align: center;"> or =</p> </td> </tr> </table>	<p style="text-align: center;">STRAIGHT</p> <p>You can place your cards this way:</p> <p style="text-align: center;">_ _ or </p>	<p style="text-align: center;">PERPENDICULAR</p> <p>You can place your cards this way:</p> <p style="text-align: center;">_ or _</p>	<p style="text-align: center;">PARALLEL</p> <p>You can place your cards this way:</p> <p style="text-align: center;"> or =</p>

Variations of the Game	Players can draw each of the lines instead of using sticks and the specific measurement for each stick can be shared with them.			
Enrichment	<p>Add diagonal lines and angles other than right angles to the game</p> <p>Students can construct by picking up sticks with different lengths, so that students have to measure how many straight sticks are needed to reach the finish line.</p>			
Simplification	The game can be played with only straight and perpendicular lines
